SITE REBUILD PROPOSAL

A new home for DME Academy — built clean, built right.

A consolidated dmeacademy.com + dmecamps.com, custom-built on WordPress. No page builders. No plugin sprawl. Fully isolated from the current site. HubSpot stays the system of record.

- TOTAL FIXED BID · $3,900
- 60 HOURS · $65/HR
- TURNAROUND · ~1 WEEK

01 · THE APPROACH

Four principles. Everything else follows from them.

/01

/02

CUSTOM HAND-CODED THEME

No Elementor, no Beaver Builder, no Bricks. Real PHP templates with clean editable content fields. Faster, leaner, and easier for your team to update than any builder-driven site.

TOTAL ISOLATION

The new site lives on a different host (Kinsta), with a fresh database, fresh files, and no shared credentials with the current site. Whatever's affecting the old site can't reach the new one.

/03

HUBSPOT-FIRST

HubSpot stays your CRM and system of record. Forms route directly to HubSpot. Tracking pixel site-wide. Meeting embeds for admissions consults. Nothing competes with what already works.

/04

REAL DME BRAND

We pulled the actual hex values, typography, and logo from your production site — not the approximations in the spec doc. The result feels unmistakably DME from the first frame.

02 · NOW VS. NEXT

What changes — at a glance.

The current site has accumulated layers of plugins and a dated builder over the years. The v2 build modernizes the foundation while keeping the structure and brand you already have.

CURRENT SITE	
Plugins loaded on homepage	11+
Page builder	Builder-based
Custom theme	Inherited
Font families loaded	3
Two domains	dmeacademy + dmecamps
SEO posture	Vulnerable

V2 REBUILD	
Plugins loaded on homepage	4

Page builder	None — hand-coded
Custom theme	Built fresh for DME
Font families loaded	2
Consolidated	One site, two paths
SEO posture	Fully isolated, hardened

03 · SCOPE OF WORK

What's included.

A complete site replacement — not a phased proof-of-concept. One fixed bid, one launch, one site that puts the current dmeacademy.com out of its misery.

SINGLE FIXED BID · 60 HOURS

DME Academy v2 — Complete Site Rebuild

$3,900 · $1,950 deposit · $1,950 on launch

- Custom hand-coded WordPress theme — no Elementor, no Beaver Builder, no page builders of any kind

- All page templates from your spec doc, built design-faithful with real DME branding
- Consolidates dmeacademy.com + dmecamps.com into a single site with clear paths for both audiences
- Custom post types for editorial content: Sport, Camp, News, Program, Coach
- Editable in standard WordPress admin — your team manages content the way they always have, just faster and cleaner
- HubSpot tracking pixel site-wide + HubSpot forms wired into your CRM
- SEO-optimized: schema markup, sitemap, RankMath configured, mobile-first responsive, accessibility-checked
- Targeting **mid-90s to 100** on Google PageSpeed across all pages — fast enough that page speed actively helps SEO instead of dragging it
- 301 redirect map preserving SEO equity from the current site
- DNS cutover with MX-record audit so email isn't disrupted at launch
- Content migration from current site — text, key media, news archive (within reason; gigantic media libraries scoped separately)

Fixed bid · No surprise hourly overruns · Half up front, half on launch · Stripe (cards or ACH) accepted.

04 · HOSTING · WHY KINSTA

Premium managed WordPress, built for sites like yours.

Kinsta is one of the two top-tier managed WordPress hosts in the world — built on Google Cloud's premium network, with a security and performance posture that fits a school site exactly. We're recommending a clean break from the current host, not a side-by-side comparison shop.

/01

BUILT ON GOOGLE CLOUD PREMIUM TIER

The same infrastructure layer that runs Google's own products. 35+ datacenters globally, low-latency routing, enterprise-grade DDoS protection. The current host can't match the underlying network performance.

/02

FREE CLOUDFLARE ENTERPRISE CDN

Included on every plan. Pages load from the closest edge server to each visitor — meaningful for a school whose audience spans recruiting territories. Most hosts charge extra for this; Kinsta bundles it.

/03

DAILY BACKUPS, 14-DAY RETENTION

Automatic, off-site, restorable in one click. If anything ever goes sideways, we roll back to yesterday in under five minutes. This is how a school's site should be backed up — full stop.

/04

HARDWARE-ISOLATED STAGING

Every site gets its own one-click staging environment. We can test changes on a copy of the live site without risk, then push them live with another click. Currently a multi-hour task on most hosts.

/05

MALWARE SCANNING + REMOVAL SLA

Kinsta scans for malware automatically. If their scan ever finds something they didn't catch, they remove it themselves at no charge. The current host doesn't offer this.

/06

LATEST PHP, LATEST EVERYTHING

PHP 8.3, the latest WordPress core, automatic security patches, free SSL via Let's Encrypt (auto-renewing). The platform stays modern; we don't have to fight the host to get current.

PLAN RECOMMENDATION

~$70/mo

Kinsta Pro tier — handles up to 50K monthly visits with headroom for enrollment-season spikes. We can start on Hobby ($35/mo) and one-click upgrade if traffic grows.

ANNUAL COST VS CURRENT

$840/yr

Comparable to or less than what DME pays now for WP Engine — for materially better infrastructure and the reset of starting clean on a non-compromised environment.

ACCOUNT OWNERSHIP

100%

The Kinsta account is registered to DME, not Socia Visual. You own the hosting, the domain, the SSL, the backups, and the site — outright, with no middlemen.

05 · HUBSPOT INTEGRATION

What we handle — and what you'll need to provide.

HubSpot stays your CRM and system of record. The new site is downstream of HubSpot, never competing with it. Most of the integration work is on our side — but we'll need a small number of things from your team to wire it up cleanly.

/ Our side

WHAT SOCIA VISUAL HANDLES

Everything technical on the WordPress side, end to end:

- Drop the HubSpot tracking pixel site-wide
- Embed HubSpot forms (Apply, Contact, Camp Inquiry, Newsletter)
- Style forms to match the new DME design system
- Embed HubSpot meeting links (admissions consults)
- Wire HubSpot chat widget if you use one
- Test every form end-to-end into HubSpot CRM
- Confirm conversion events fire correctly in HubSpot reporting

/ Your side

WHAT WE'LL NEED FROM YOU (≈2–3 HRS TOTAL)

Small but important — most of these are 5-minute lookups in HubSpot:

- **HubSpot Portal ID / Hub ID** (single number, lives in HubSpot Settings)
- **Forms list** — confirm or build the forms in HubSpot's form builder for: Apply, Contact, Camp Inquiry, Newsletter, plus any sport-specific inquiries
- **Meeting links** — which staff calendars are bookable for admissions consults? Provide the HubSpot meeting URLs
- **Chat widget** — yes/no, and if yes confirm which inbox routes
- **CRM workflows** — confirm the existing lead-routing workflows are pointed where you want them (your team owns the workflow logic; we just feed leads in)

→ **HubSpot CMS pages** (if any) — decide whether any pages currently on HubSpot CMS get migrated to WordPress or stay on HubSpot

None of this is gating the build — we can start without it.
We'll just need this list before we deploy forms in week one.

06 · GET STARTED

Pay below to kick this off.

Stripe is now wired into our invoices — cards or ACH, both work directly from these links. The deposit invoice opens in the standard Socia Visual invoice viewer with a Pay button.

DEPOSIT · REQUIRED TO START

DME Academy v2 — Site Rebuild

Custom hand-coded WordPress, fully isolated, HubSpot-integrated. Half of $3,900 fixed bid; final $1,950 due on launch (~1 week from kickoff).
